Subject: MS world monopoly

Dear Sir/Madam: Greetings!

I believe that the people at the top of Microsoft, who are controlling and manipulating the world

domination, should be severely punished and not just a pat on their hands!

I have invested a lot in my (Amiga) computer and am unable to use most of the software/hardware unless I import them from overseas.

This MicroSoft world monopoly went a bit too far!

I hope you exercise your authority and punish them with the fullest extent of the law. In my opinion a few years in jail would be appropriate for the top ten of Microsoft!..I thank you & remain - yours sincerely Anthony E. Bodo
